## Subject Index to Volume 35

(L) = Letter to the Editor; (E) = Editorial; (NC) = News and Comments;  
(R) = Review Article

### Abortions

- chromosome abnormalities and spontaneous fetal death following amniocentesis, 110
- maternal smoking and trisomy in, 421
- rates of structural chromosome rearrangements in, 96
- twinning rate in spontaneous, 987
- Acentric fragment, stable, in childhood congenital malformations, 91
- Aldehyde dehydrogenase
  - determination of genotypes of, 1107
  - isozyme deficiency and alcohol sensitivity, 769
- Alkaline phosphatase activity, determinants of variation in plasma, a twin study, 978
- $\alpha$ -Globin gene cluster, DNA polymorphisms in, 1086
- $\alpha$ -Glucosidase acid, deficiency, genetic heterogeneity in, 21
- $\alpha_1$ -Antitrypsin gene, localization to chromosome 14 by molecular hybridization, 385
- Alport syndrome, X-linked, family P revisited, 1241
- Alzheimer disease, susceptibility loci in chromosomes 6 and 14, 443
- Amniocentesis, chromosome abnormalities and spontaneous fetal death following, 110
- Aminotransferases, detection of on starch gels, 533(L)
- Androgen receptor, testicular feminization, 376
- Aneuploidy, altered embryonic selection contributes to, 1057(L)
- Arylesterase polymorphism, and para-oxonase polymorphism, 1126

### Arylsulfatase A

- different numbers of asparagine-linked oligosaccharides, 228
- two allelic forms of, 228
- Basal cell naevus syndrome, studies on radiosensitivity, 58
- BF locus, five rare variants of, 652
- Blepharophimosis, ptosis, and epicanthus inversus syndrome, 1020
- Blood pressure, multivariate models in, 1196
- Books reviewed, authors/editors
  - Anderson, V. E., 1068
  - Bartsocas, C., 1067
  - Bloom, A., 160

- Violence and the Politics of Research*, 325
- Cancer, familial predisposition to, 454
- Cell Mixing and Its Sequelae, William Allan Memorial Award Address, 1081
- Chromomere map, mid/late pachytene human oocytes, 879
- Chromosome duplication, 9q34 syndrome, 1005
- Chromosome 4, linkage of serum albumin and  $\alpha$ -fetoprotein within q11-22, 565
- Chromosome rearrangements  
frequency and mutation rate of, 301  
in advanced maternal age, 301  
rates in human fetuses, 96
- Chromosomes  
heritable fragile sites on, 432  
human transferrin receptor at 3q(22-ter), 573
- Chromosome structural rearrangements, distribution of break points in, 288
- Citrullinemia, prenatal diagnosis of affected fetus, 85
- Collagen genes,  $\alpha 2(I)$  gene dosage in, 584
- Complement C4, associated with subtypes of HLA-B17 in different racial groups, 309
- Congenital glaucoma, inheritance of, 645
- Congenital pernicious anemia, absence of immunoreactive intrinsic factor molecule, 67
- Consanguinity, in age-structured human populations, 962
- Cystic fibrosis, mutations at more than one locus, 838
- Data analysis, misconceptions in "Trials of Structured Exploratory Data Analysis," 534(L)
- Deafness, responsibilities in genetic counseling, 1317(L)
- Deletion, terminal with stable acentric fragment of 1q, 91
- DNA polymorphisms, see restriction fragment length polymorphisms
- Down syndrome  
analysis of paternal-age effect, 1297  
decreased HLA heterogeneity in parents of, 1289  
rates and relaxed selection at older maternal ages, 1307
- Embryonic selection  
altered embryonic selection contrib-

- utes to maternal-age effect in aneuploidy, 1057(L)
  - maternal age and altered embryonic selection, 1064
- Epicanthus inversus syndrome, in blepharophimosis ptosis, 1020
- Epistatic two-locus models, bias in estimate of  $\theta$ , 1053(L)
- Errata
  - M. Camargo and J. Cervenka, Patterns of DNA Replication of Human Chromosomes. II. Replication Map and Replication Model (34:757-780, 1982), 33, 1080
- Ewens' equivalence theorem, ascertainment sampling schemes, 687
- Fragile sites
  - BrdU-sensitive on chromosome 16, 530(L)
  - new folate-sensitive sites, 432
  - spontaneous expression of, fra(10)(q25), 123
  - 10q25 in normal culture conditions, 126(L)
  - thymidylate synthetase in expression of, 1276
- Fragile X
  - combined effects of FUDR and methionine depletion on, 117
  - decreased expression by 5-azacytidine and S-adenosylhomocysteine, 1270
  - in heterozygous carriers, 861
  - intracellular folate distribution in, 869
- Friedreich ataxia, incidence in Italy estimated from consanguineous marriages, 523
- Galactosyltransferase, in expression of A<sub>2</sub> character in A<sup>1</sup>B red cells, 1117
- Gardner syndrome, inherited susceptibility to retrovirus, 919
- Gaucher disease
  - immunological and catalytic quantitation of splenic glucocerebrosidase in, 621
  - three clinical forms of, 621
- Gc gene frequencies, in California Hispanic population, 773
- Gene dosage, for  $\alpha 2(I)$  procollagen, 584
- Genetic counseling, utility and efficiency of marker genes for, 592
- Genetic path analysis, in genetic epidemiology, a critique, 695
- Glaucoma
  - further studies of familial transmission, 1156
  - inheritance of, 645
- Globin
  - restriction endonuclease mapping of  $\gamma$ - $\delta$ - $\beta$  in HPFH, 611
- Glutamate pyruvate transaminase, linkage to vitelliform macular dystrophy, 78
- Glutathione peroxidase, further electrophoretic studies of, 914
- Glyoxalase I system, new subpolymorphic variant, 1042
- G<sub>M1</sub> gangliosidosis
  - prenatal diagnosis by detection of galactosyl oligosaccharides, 1034
  - presence of activator protein, 629
- G<sub>M2</sub> gangliosidosis
  - infantile and adult, 900
  - juvenile A<sup>MB</sup> variant, 551
  - N-acetyl- $\beta$ -D-galactosaminidase activity in, 900
  - presence of activator proteins, 629
  - two variants of type-AB, 520
- Goniodysgenesis, congenital glaucoma to, 645
- H-deficient blood groups
  - $\alpha$ -2-L-fucosyltransferase activity in, 497
  - differences between Indians and whites on Reunion Island, 484
- Hemoglobin Grady, Atlanta family revisited, 1314(L)
- Hereditary persistence of fetal hemoglobin, restriction endonuclease mapping of, 611

**HLA**

decreased heterogeneity in parents of children with Down syndrome, 1289

neutrality or selection, 1055(L)  
regional localization by recombination with fragile site 6p23, 1284

HLA antigens, shared and reproductive performance in Hutterites, 994

HLA-associated disease, new methodology for analysis of, 127(L)

HLA locus, probability of exclusion based on, 1048

Human gene map, 134

Human Gene Mapping Workshop VII, 1334(NC)

Huntington disease, models for maternal factor in, 845

H. Warner Kloepfer: In Memoriam, 161(NC)

Hyperlysinemia, prognosis of, 438

In situ hybridization, assignment of  $\alpha_1$ -antitrypsin gene by, 385

Insulin-dependent diabetes mellitus  
HLA in, 201  
linkage studies, two-locus models, and genetic heterogeneity, 1139

Limb defects, in large fetus collection, 508

**Linkage**

atypical vitelliform macular dystrophy to soluble glutamate pyruvate transaminase, 78

HLA and fragile site, 1284

marker locus in quantitative trait of sibs, 263

serum albumin and  $\alpha$ -fetoproteins, 565

Linkage analysis, in dominant optic atrophy, 1190

Lipids, heterogeneity between populations and multifactorial inheritance of, 468

Magnesium concentrations, genetics of plasma and red cell, 938

Major gene effects, in psychological test scores, 1179

Mitochondrial DNAs, polymorphic Hinc site in, Oriental and Caucasian polymorphic Hinc sites, 167

Monoclonal antibodies, alkaline phosphatase, 1

Multifactorial diseases, genetic analysis of, 130(L)

Multifactorial inheritance, of plasma lipids, 468

Multivariate models for human genetic analysis, in blood pressure and weight, 1196

Mutations, in cystic fibrosis, 838

Optic atrophy, linkage analysis in dominant form, 1190

Pachytene, chromomere map in mid/late human oocytes, 879

Paraoxonase polymorphism  
arylesterase polymorphism and, 1126  
identification of phenotypes by response to salts, 214  
population, family, biochemical, and linkage studies, 393

**Path analysis**

defense of in genetic epidemiology, 733

in genetic epidemiology, 757

Pedigree data, estimation of due to error marker mistyping, 241

PGM<sub>1</sub> gene frequencies, in California Hispanic population, 773

Placental alkaline phosphatase, human variance studies by monoclonal antibodies, 1

**Polymorphisms**

11 enzymes in Japanese, 656

in human lymphocyte detected by two-dimensional gel electrophoresis, 827

- Properdin, variance at BF locus, 645
- Propionyl-CoA carboxylase, assignment of  $\alpha$  and  $\beta$  chains to complementation groups, 889
- Propionyl CoA carboxylase deficiency, absence of cross-reacting material in, 409
- Psychological test scores, errors in inference in the detection of major gene effects, 1179
- Regional assignment, of  $\alpha 2(I)$  procollagen, 584
- Resolutions
- Prevention of nuclear war, American Society of Human Genetics, 162(NC)
  - Revocation of advanced degrees, American Society of Human Genetics, 163(NC)
- Restriction endonuclease mapping, of  $\gamma$ - $\delta$ - $\beta$ -globin region, 611
- Restriction fragment length polymorphisms
- close linkage to proopiomelanocortin, 1090
  - D14S1*(101) localization to chromosome 14 in situ hybridization, 1097
  - 5'-flanking region and human insulin gene, 193
  - in  $\alpha$ -globin gene cluster, 1086
  - incidence of diabetes, 193
  - model for length distributions, a, 795
  - polymorphic Hinc II site in mitochondrial DNAs, 167
  - sib-pair strategy for the use of, to study mode of transmission of type II diabetes, 34
  - some combinatorial problems of, 177
- Schizoaffective mood disorders, bipolar, unipolar segregation and linkage analysis, 274
- Schizophrenia, transmission under multifactorial threshold model, 1161
- Segregation analysis, a unified model for, 816
- Segregation analysis of simulated data, Genetic Analysis Workshop I, 784(NC)
- Sex ratio, two-generation study of, 951
- Sickle-cell anemia, heterogeneity of, 1224
- Sister chromatid exchange, after ultrasound exposure in vivo, 932
- Social selection
- fitness modification of offspring by affected parent at two loci, 675
  - theories of in human populations, 362(R)
- Spontaneous fetal death, following amniocentesis, 110
- Steroid sulfatase, X-linked, 234
- Tay-Sachs disease, in North American Jewish populations, 1258
- Testicular feminization, expression of mutant androgen receptor in, 376
- Testosterone-binding globulin, genetic variation in human serum, detection of genetic variation with radioactive ligands, 49
- Thalassemia
- $\beta$  due to a deletion in the nucleotide substituted in  $\beta^S$ -globin gene, 1028
  - molecular mechanisms, 333(R)
- Transferrin receptor, on chromosome 3q(22-ter), 573
- Translocation, 14/X with partial trisomy 14, 635
- Trisomy
- in utero selection against fetuses with, 1059(L)
  - partial of 14 in 14/X translocation, 635
- Twins
- birth weight and placental proximity in, 318
  - birth weight in monozygotic, 1211

- Vitelliform macular dystrophy, linkage  
to soluble glutamate pyruvate trans-  
aminase, 78
- William Allan Memorial Award  
address, 1081  
presentation, 1077
- X chromosome  
fragile X expression, 1270
- see fragile X, 117
- X-linked, steroid sulfatase locus dosage  
effect, 234
- X-linked disorders  
Alport syndrome, 1241  
deleterious genes in human popula-  
tions, 1252  
steroid sulfatase, 234
